How does evData Pro Support ANSI/EIA-748-C Compliance

32 Guidelines (Section 2)

- Guideline 1) Supports WBS structure
- Guideline 2) Supports OBS structure
    - As well as a CLIN, Control Account, Work Package and any other break down structure
- Guideline 3) Supports budget planning, estimate planning, WAD, BCRs and imports to/from other EVM tools. evData Pro also has two RAM reports
- Guideline 4) Supports any element of cost including overhead and/or indirect costs
- Guideline 5) Supports Control Accounts as well as work packages and relationship between OBS and WBS, control accounts, work packages, etc.
- Guideline 6) Supports schedule by importing from other schedule tools
- Guideline 7) Supports schedule by importing from other schedule tools
- Guideline 8) Supports WADs and BCR workflow process
- Guideline 9) Supports any number of cost elements
- Guideline 10) Supports any number work packages
- Guideline 11) Supports a detailed cost rollup of control accounts, CLINs, or any other type of work breakdown structure
- Guideline 12) Supports a method that identifies LOE type work
- Guideline 13) Supports budgets at any account level as well as WADs
- Guideline 14) Supports elements of cost for management reserve and undistributed budgets
- Guideline 15) Supports a whole EAC Justification workflow
- Guideline 16) Supports methods to identify director versus indirect costs
- Guideline 17) Supports methods to summarize any cost by any breakdown structure
- Guideline 18) Supports methods to summarize any cost by any breakdown structure
- Guideline 19) Supports methods to identify director versus indirect costs
- Guideline 20) Supports report for material cost that identify unit costs at any account level
- Guideline 21) Supports report for material cost that identify unit costs at any account level
- Guideline 22) Supports schedule variances and cost variance calculations at any account level
- Guideline 23) Supports rules that identify significant variance for analysis…up to 14 different business rules
- Guideline 24) Supports rules that identify significant indirect variances for analysis…
- Guideline 25) Supports summarizing any account for any element of cost for any break down structure
- Guideline 26) Supports corrective action item tracking workflow process
- Guideline 27) Supports complete EAC Justification workflow process
-
- Guideline 28) Supports real-time estimate and budget planning / pricing process
-

- Guideline 29) Supports budget change thru a WAD process, BCR process, and thru a reporting process delta BAC (budget at completion)
- Guideline 30) Supports by limiting any changes that can be made retroactively
- Guideline 31) Supports by limiting any changes that can be made retroactively
- Guideline 32) Supports PMBs via a number of methods
